1.03 INTRODUCTION

OWNER reserves the right to select one or more providers/services and may elect to reject or eliminate one or more of the requested services.

The Teller County Administration Department/Office is a division of Teller County. Teller County Administration Department provides administrative oversight over all Teller County offices other than those that report to the Sheriff, Clerk and Recorder, Assessor, Treasurer, and Coroner.
This includes primarily the offices of Finance, Public Works, Social Services, Public Health, Information Technology, and Emergency Management.

The purpose of this RFP is to solicit a Broadband Expansion Plan Concept and financial bid for developing this plan. The shared goal of entities in Teller County is to provide abundant, redundant and affordable Internet service to our citizens, businesses and visitors. The services proposed by the Contractor shall be sufficient to bring each participating jurisdiction in the County to an informed level of preparedness to enable creation of one or more final design and construction phases by participating jurisdictions and/or commercial entities, to implement at their discretion. The plan will primarily address broadband connectivity through both terrestrial and wireless technologies, and include telephone services, public safety/emergency management communications systems, and other connectivity content. The development of an implementation plan shall address the need to coordinate multiple private and public efforts towards a common goal of improving broadband capability within the County. Community stakeholders, including both public and private, shall be invited to participate in the project. The creation of the plan should contemplate implementation by participating jurisdictions and/or commercial entities with direction, guidance, technical expertise, facilitation and document creation provided by the Contractor.

1.04 SCOPE OF WORK

The Contractor shall prepare and submit a documented plan that will bring each participating jurisdiction to a level of preparedness sufficient to transition into final design and construction phases. At a minimum, the final documented plan will address the following:

1) A total not-to-exceed cost for developing the plan;
2) an assessment of current levels of broadband service available, list of providers, and associated prices to populated areas of Teller County: Cripple Creek, Victor, Woodland Park, Divide, Florissant, populated areas immediately surrounding these cities, named housing developments, and other populated areas;
3) identification of public and private assets already in place and available for contractual use to address these needs;
4) an assessment of needs, both infrastructure and services, through any reasonable means including but not limited to surveys, public meetings, and asset mapping or other methods as proposed by the Contractor, including currently existing and available resources such as community assessments, state asset mapping, and others;
5) educational workshops, meetings, documentation and/or other communication necessary to ensure that the Stakeholders have the information needed on regulations, economics, and technology and funding sources to develop a realistic plan;
6) identification of gaps in the network of service coverage to populated areas and a blueprint to fill these gaps, including cost estimates and identification of public and private funding resources, such as the FirstNet initiative, and assistance in prioritizing projects/needs based on desired service levels and cost of service;
7) identify specific options for projects and associated projected costs for evaluation by participating jurisdictions and/or commercial entities to reduce or eliminate gaps in broadband service;
8) if the Contractor develops or uses a computer model or spreadsheet as a part of this project, the Contractor shall submit to the County for approval all proposed model names and data formats prior to beginning work on that task. All data shall be submitted to the County in written and electronic forms with the final report. Magnetic disks, if used, shall be labeled by the Contractor to provide sufficient detail to access the information on the disks;
9) address sustainability, scalability, and maintenance of the network into the future;
10) maintain such records as are necessary pursuant to the Department of Local Affairs (DOLA) Energy and Mineral Impact Assistance Fund (EIAF) and Teller County rules to assure proper accounting of all costs and funds collected. These records shall be submitted for audit purposes to Teller County upon request.

These steps are to ensure that the County has the ability to participate in statewide efforts already underway in a coordinated approach to improve broadband service in the region. TELLER COUNTY will convene a Local Technology Planning Team (LTPT) steering committee that will consist of one representative from each local government and each participating jurisdiction. This representative will serve as the point person for their governing body and work with TELLER COUNTY staff and the Contractor in identifying the appropriate stakeholders for meetings, workshops, or discussions regarding items related to that entity and helping to implement work assignments as necessary. The Steering Committee will meet periodically to oversee and direct the project. The LTPT Steering Committee will designate a Project Manager.

The CONTRACTOR should expect to:
1) Work with TELLER COUNTY and the LTPT Steering Committee to specifically identify the components of the implementation plan document.
2) Work with TELLER COUNTY and the LTPT Steering Committee to identify all of the required meetings, workshops, and tasks necessary to complete the plan document.
3) Work with participating jurisdictions and the Colorado State Office of Information Technology (OIT) to collect, verify and compile data.
4) Attend all LTPT Steering Committee meetings.
5) Facilitate community specific meetings and workshops as necessary.
6) Use existing maps and information, and develop additional data as needed for the county implementation plan document provided in a written and editable electronic format as agreed upon by TELLER COUNTY.
